When You Wish Upon a Star

A RENOVATION SUCCESS STORY STARTING WITH A WISH LIST

Just like great recipes that start with a list of ingredients, a great home renovation starts with a wish list. "It's the first step in understanding our clients and their needs," said Tim Frost, owner of Peregrine Contracting who along with Shawn Sweeney, a designer for the company, worked closely with the owners of this home to define what they wanted and help them stay within their budget.

Christine had a number of things she wanted to accomplish with her renovation; first, and foremost she wanted a simple, farmhouse feel with great living spaces for her family. It was important to have a sense of connectedness throughout the rooms of the home while also incorporating some smaller spaces for a more intimate feel. It all sounds easy enough but often times this request can be a challenge to any builder. So after many hours working with the design/build team, the conclusion was that Christine and her family would renovate their kitchen, family room, dining area, and living room.

Christine loves to cook, and her first wish was for a kitchen with lots of counter space, top quality appliances, and an island where people could sit and eat, or use as a service bar. In keeping with the farmhouse feel, the kitchen renovation included custom bead board cabinetry painted in a creamy antique white color, which adds tons of charm as well as storage space. The kitchen also included a beaded refrigerator door for continuity in the look, an office station, a pantry, and glass front cabinets for displaying her dishes. The countertops are a unique combination of mahogany wood and Kerala granite, which together add

simple elegance as well as plenty of space to work. The Viking stove area stands out with an antiqued jade tile backsplash, open shelving for spices and a pot faucet. Add the recessed lighting and mini-pendants and cooking is a breeze.

One of the most exciting additions to the kitchen appears on the north and east walls which once held cupboards. They now host big picture windows
